

# Jacketed Graphite Packing

## Description:

Jacketed Graphite Packing braided from graphite yarns with metal alloy and glass fiber casing like the socks outside. Used in any steam valves applications..

## Typical Application

> It is the ideal choice for high pressure, high temperature steam valves service.

## Prime Features

- > Highest pressure, and temperature
- > Good thermal and chemical resistance and high elasticity.

## Technical Data

| Material          |        | 100% Expanded Graphite Yarn and Metal Socks                  |
|-------------------|--------|--|
| Temperature Range |        | -200 up to +555 oC atmosphere;<br>-200 up to +850oC in Steam |
| Process           | Valves | 55 Mpa   |
| PH                |        | 0~14   |
| Density           |        | 1.75 g/cm3   |
