Acrylic Fiber Treated With Graphite

Description:

Braided from high strength acrylic fiber treated with graphite and special lubrication. The graphite increased the temperature and excellent lubricated.

Typical Application

- > Universal packing for pumps and valves
- > Handle water, air, steam, mild acids and alkalis
- > All kinds of organic solvents and chemicals

Prime Features

- > Especially for the condition of high-temperature, high pressure, medium speed.
- > The graphite increases the service temperature and the density of the packing
