

Glass Fiber Sleeve

Description:

Glass fiber sleeving content of the high temperature resistance, it is composed of woven non-alkali fiberglass. The glass fiber sleeve with its good dielectric strength, flexibility and flame retarding properties. Tubular braiding to obtain an extremely elastic and flexible sleeve.

Specification:

Temperature: 550°C;

Color: White;

Wall thickness: 1.0mm ~ 3.0mm, is standard;

Inner diameter: 10mm to 100mm;

Length: 30m to 200m.

Application:

Cable and wire insulation, hose covering, protection for hydraulic, sealing, thermal insulation, cover tubes and pipes.

For high temperature resistant electrical cable, wire covering, and high temperature pipe wrapping.

Package:

Inner plastic bag and outer carton box.

20m/roll, 30m/roll, other package on requirement.
